Registered Engineer - California C51,640  
NCEES 25,517

San Luis Obispo Chamber of Commerce - Leadership, Class V  
PEI - Affiliate Member

**EXPERIENCE**

Jeff is one of the founders of LHB & Associates; his knowledge base includes project management, entitlement processing, design of commercial and residential projects and construction administration.

His work in the public and private sectors include design and preparation of street improvement plans, utility plans, water/sewer and storm drain systems for commercial retail projects and residential subdivisions.

Jeff utilizes his communication and organizational skills to provide an on-going dialogue between the owner, the design-build team and regulatory agencies. In this fashion, the needs of the client are maintained and challenges are addressed and resolved before becoming impacts to the project.
