EXPERIENCE

JR is one of the founders of LHB & Associates; his architectural design experience and knowledge base includes preparation of preliminary layout schemes for client approval; entitlement level drawings and construction documents for residential and commercial projects. His major area of responsibility includes the design and supervision of design components of projects, including building design, site layout and infrastructure improvements required to service development properties.

Through his involvement with building, planning, and public works projects, Mr. Beard has developed a thorough understanding of the mechanics of construction document development and processing. His knowledge of local, state, and federal agency requirements enables him to expedite the production of engineering and architectural documents in accordance with all applicable standards. This minimizes processing delays, and ensures that the project review process runs smoothly, effectively and efficiently.
